# **Guide lines for making "Worship Songs"**

# 1)Add Song

# 2)Add Intro

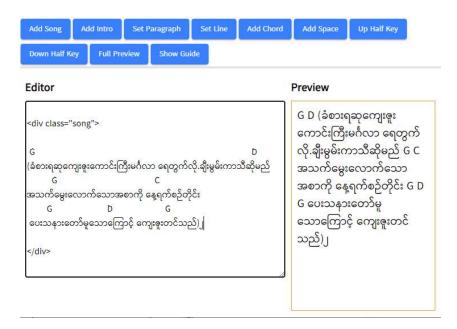

### **Note**

N1)Don't use like that\_\_ { Em C G D }2 or [ Em C G D]2 . You must use ( Em C G D )2 . I means you must use " ( " instead of " { " or " [ " and you must use " ) " instead of " } " or " ] ".

- N2) You must set *intro* as paragraph like above picture.
- N3) [] means space.
- N4) [\_Chord-Name] means intro chord name. If your chord is C, you write like that\_\_ [\_C] . You cannot use this format in song content. This format [\_Chord-Name] is only for intro or outro.

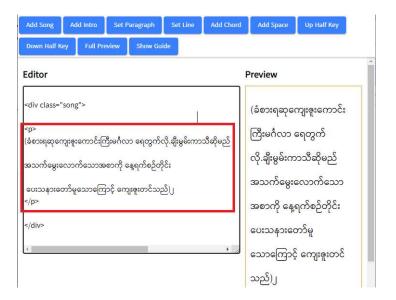

## 3) Set Paragraph Verse or Chorus or Bridge

Step 1) Insert Verse or Chorus like below.

Step 2) Make Selection your Verse or Chorus or Bridge to set paragraph

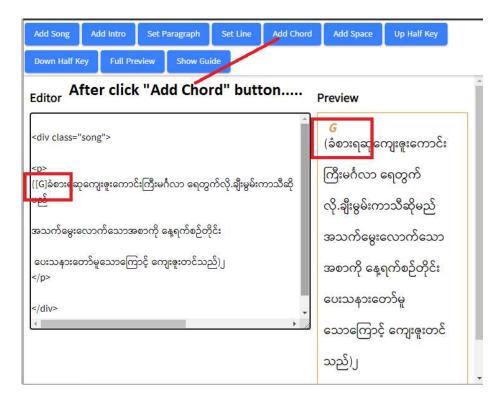

You will see paragraph like above after click "Set Paragraph" button.

# 4) Add Song Chord

**Step 1)** Place mouse **Cursor** before character that you want to place chord above the character and click "Add Chord" button. You will see Chord like below.

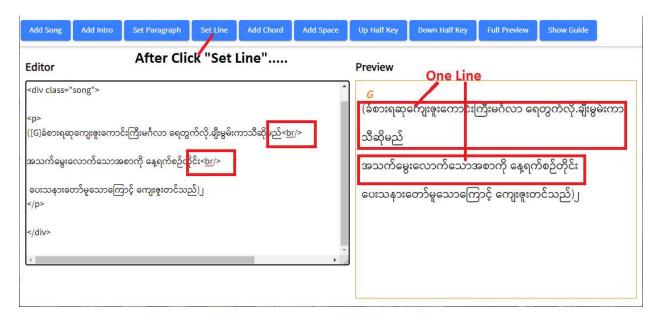

#### Note

N1) This format [Chord-Name] means to Song Chord Name. If your chord name is E, you write like that\_\_ [E]. This format [Chord-Name] is only for Verse or Chorus or Bridge.

## 5) Set Song Line

**Step 1)** Place mouse **Cursor** after **phrase** that you want to set **Line** in **Verse or Chorus or Bridge** and click "**Set Line**" button. You will see **Line** like below.

# 6) Add Space between Characters

If you want two or more spaces, You must use "Add Space" button because does not work two spaces or more spaces by spacebar in **Preview** .

**7)** To test **key change**, you can click "**Up Half Key**" and "**Down Half Key**" buttons. To view **full preview**, click "**Full Preview**".

Note:: You must set paragraph all intro,outro,bridge,verse,chorus in your song. Finally, copy content in "Editor" and paste into your database.
